To Whom it May Concern:

The purpose of this letter is to verify that the Internship at OPNET Technologies, Inc., for which Mr. Mustafa Ozdemir has applied and been accepted represents important curricular practical training that is directly related to his Ph.D. research. Mr. Ozdemir is a doctoral student in the process of working towards the Comprehensive/Dissertation Proposal and is currently supported by me as an RA. His work requires deep understanding, application and development in the OPNET simulation environment. In particular, his work, as well as other work in our group requires a high level of expertise in development OPNET tools for modeling ad hoc networks and wireless communications. This is precisely the work for which he has been hired. Hence, as his research advisor I see this as a crucial opportunity to enhance his expertise and, hence benefit the group and progress more rapidly towards completion of degree requirements.

Sincerely,

A. Bruce McDonald
